A Note from Alan Wolfelt

Thank you for your interest in our educational seminars for bereavement caregivers. Supporting those who support the bereaved is my life's work and passion. I simply love to teach and am so gratified that thousands

of caregivers have participated in my small group seminars over the past 30 years.

We are privileged to share the art of compassionate caregiving with people from across North America and the world. We will do our best to make this an experience you will remember and value for the rest of your life!

If you are thinking of attending a Center for Loss seminar, I invite you to consider the philosophy that informs my work with bereaved people as well as my teaching. I believe in “companioning” the bereaved instead of “treating” them.

I have taken liberties with the noun “companion” and made it into the verb “companioning” because it so well captures the type of counseling relationship I support. Actually, the word companion, when broken down into its original Latin roots, means *com* for “with” and *pan* for “bread.” Someone you would share a meal with. A friend. An equal.

Please be aware that not everyone is comfortable in the culture of “companioning.” Please read through the information contained here very carefully. I urge you to use discernment in determining if the Center for Loss learning experiences are a good match for your fundamental learning style and philosophy of caring for your fellow human beings during times of loss and grief. Please call the Center with questions or to inquire about course availability. I look forward to meeting you and learning from each other.

Alan D. Wolfelt, Ph.D., C.T.
Director

DR. WOLFELT'S TENETS OF COMPANIONING THE BEREAVED

Companioning is about being present to another person's pain; it is not about taking away the pain.

Companioning is about going to the wilderness of the soul with another human being; it is not about thinking you are responsible for finding the way out.

Companioning is about honoring the spirit; it is not about focusing on the intellect.

Companioning is about listening with the heart; it is not about analyzing with the head.

Companioning is about bearing witness to the struggles of others; it is not about judging or directing these struggles.

Companioning is about walking alongside; it is not about leading.

Companioning is about discovering the gifts of sacred silence; it is not about filling up every moment with words.

Companioning is about being still; it is not about frantic movement forward.

Companioning is about respecting disorder and confusion; it is not about imposing order and logic.

Companioning is about learning from others; it is not about teaching them.

Companioning is about compassionate curiosity; it is not about expertise.

“I was truly touched by the strength of spirit of the participants...and the training content teaches the art of ‘walking with’ and ‘companioning’ those in grief. I’m already scheduled to return for more.”

OUR FOUNDATIONAL COURSES!

These two courses are our suggested foundational courses for all other Center for Loss trainings. However, we realize that for certain caregivers, taking just one or two of our specialty courses (such as Helping Children and Adolescents Cope with Grief) without first completing BST or CSK may make the most sense. Please call, write, or e-mail us if you would like to discuss your unique needs.

Exploring Spiritual Dimensions of Death, Grief and Mourning

2017 SCOTTSDALE • December 11-14

Bereavement naturally results in the “dark night of the soul,” writes Dr. Wolfelt. A central need of those in grief is to rejuvenate the spirit, to discover

Participants will receive a copy of Dr. Wolfelt’s book *Healing Your Grieving Soul*.

a reason to get one’s feet out of bed in the morning. Dr. Wolfelt will explore

- The importance of “companioning” vs. “treating” the bereaved
- Definitions of spirituality and faith
- Themes of spiritual importance to the bereaved
- Helping the bereaved reconstruct meaning and purpose in life

- A spiritual assessment tool
- Pain and suffering in the context of loss and grief
- Grief as a transformative experience

Plan to join us as we explore the very heart -- spirituality -- of death, grief, and mourning.

The Depression of Grief

2017 FORT COLLINS • October 8-11

This seminar will explore a variety of important topics related to the depression of grief. Dr. Wolfelt will explore how it is often normal and necessary to experience reactive depression after a significant loss, especially the death of someone loved. However, depression can sometimes be totally disabling and evolve into a clinical depression, resulting in a blocked path to healing. Come join us for a much-needed comprehensive examination of this topic.

An outline of the course includes

- Introduction: the importance of the topic
- Brief review of “normal” symptoms of grief
- Exploring the sadness of grief
 - Defining clinical depression and its sub-types
 - Understanding the differential diagnosis of clinical depression and normal depressive grief
- Introduction to “complicated” mourning
- Understanding authentic mourning as “treatment”: the six needs of mourning
- Introduction to the concept of “carried grief”
- Overview of biomedical treatments and psychotherapy “treatments”
- Companioning the depressed mourner in five areas (physical, cognitive, emotional, social, spiritual)
- Reconciliation and the transformative nature of grief

Participants will receive a copy of *The Depression of Grief: Coping with Your Sadness and Knowing When to Get Help*.

In 2017 and beyond, the material in this course will be more briefly covered in our Understanding and Responding to Complicated Mourning seminar.

PTSD: Companioning the Traumatized Griever

2017 FORT COLLINS • August 7-10

2018 FORT COLLINS • August 6-9

As our cultural and medical awareness of post-traumatic stress have grown, we as a society and as caregivers have begun to realize the sheer magnitude of the issue. It's

now thought that about eight percent of us are experiencing the condition called PTSD at any given time.

In this training, Dr. Wolfelt will explore PTSD not as a “disorder” but instead as a component of normal, though complicated, grief. He will explain his belief that the term “traumatic grief” captures better the totality of people’s experience following traumatic loss. The symptoms of grief, normal or traumatic, are care-eliciting symptoms—not signs of

illness but rather symptoms of an injury that needs careful and compassionate tending. What’s more, the missing piece in the puzzle that is traumatic grief is mourning, or the expression of grief.

Topics we will cover include:

- Traumatic versus normal grief symptoms
- Traumatic grief as a form of complicated grief
- Medical model therapies as treatment
- Mourning as “treatment”
- Catch-up mourning for traumatic grief

Participants will receive a copy of *Reframing PTSD as Traumatic Grief: How Caregivers Can Companion Traumatized Grievers Through Catch-Up Mourning*.

Exploring the Shadow of the Ghosts of Grief

2017 FORT COLLINS • October 2-5

This seminar will help participants learn more about Dr. Wolfelt’s concept of the “shadow of the ghosts” of grief. The person living in the shadow of the ghosts of grief has symptoms that suggest that the pain of grief has been inhibited, suppressed, converted, or denied. Come learn about

- The concept of “carried grief”
- Socio-cultural contributions to “carried grief”
- A five-phase wounding process
- Categories of “complicated mourning”
- Family system influences: transgenerational passing down
- The process of “catch-up” mourning

In 2017 and beyond, the material in this course will be more briefly covered in our Understanding and Responding to Complicated Mourning seminar.

Participants will receive a copy of *Living in the Shadow of the Ghosts of Grief*.

“Alan’s sense of humor was appreciated along with his undying compassion for helping others. My only regret was that the time went by way too fast.”

Exploring the Paradoxes of Mourning: Implications for Caregivers

2017 FORT COLLINS • July 17-20

2018 FORT COLLINS • July 23-26

Today, our mourning-avoidant culture clings to a number of damaging misconceptions about grief, but those who walked before us have much to teach us about the mysteries of life and death. Dr. Wolfelt has looked to the past to identify three forgotten truths about grief and mourning that, once revealed and practiced, help people move toward healing:

TRUTH ONE: You must say hello before you can say goodbye.

TRUTH TWO: You must make friends with the darkness before you can enter the light.

TRUTH THREE: You must go backward before you can go forward.

In this exciting new seminar, Dr. Wolfelt will lead caregivers through an exploration of the three truths—their historical roots as well as the ways in which

they have been abandoned and even vilified by contemporary Western culture. Participants will be provided with tips and tools for recognizing paradox symptoms in their companionship work and guiding grievers toward a transformed—and transformative—understanding of grief and mourning.

Participants will receive a copy of *The Paradoxes of Mourning: Healing Your Grief with Three Forgotten Truths*.

Suicide Grief: Companioning the Mourner

2017 FORT COLLINS • November 6-9

2018 FORT COLLINS • May 7-10

Participants will receive a copy of *Understanding Your Suicide Grief: Ten Essential Touchstones for Finding Hope and Healing Your Heart*.

This inspiring class will enhance your ability to support people impacted by the death of someone to suicide. Come join us and learn more about the normal and necessary journey into and through suicide grief.

Topics include:

- The language of suicide
- Misconceptions
- Special features of suicide grief
- Dimensions of grief response and the caregiver helping role
- Application of Dr. Wolfelt's six needs of mourning
- Exploration of the transformative nature of suicide grief

Helping Children and Adolescents Cope with Grief

2018 FORT COLLINS • July 9-12

- The major factors influencing the child's response to loss
- Dimensions of childhood grief and helping roles
- Six central reconciliation needs of childhood mourning
- Tools & techniques used in counseling bereaved children
- Potential inhibitors of the child's capacity to mourn

Support Group Facilitator Training

2017 FORT COLLINS • August 28-31
2018 FORT COLLINS • August 20-23

Enthusiasm for bereavement support group counseling has burgeoned in recent years. And, while training opportunities that advance our understanding of the bereavement process have become more available recently, less work has been done on the support group models of care. This seminar helps fill this gap.

Topics covered will include

- Support group leadership skills
- Barriers to effectiveness in support group counseling
- Detailed guidelines for operational practices (such as size of group, length, and frequency of sessions)
- Development of ground rules
- Distinguishing open-ended from closed-ended groups
- Elements of pre-screening group members
- Intervening with disruptive group members
- Publicizing your group

Participants will receive a copy of *Understanding Your Grief: Ten Essential Touchstones for Finding Hope and Healing Your Heart*, *The Understanding Your Grief Journal*, and *The Understanding Your Grief Support Group Guide*.

“Dr. Wolfelt’s genuine and skillful teaching and sharing from the heart are so valuable—He touched us all!”

2018 SCOTTSDALE • November 5-8

Complicated mourning is normal grief that has become stuck or made more complex by various circumstances, including traumatic or marginalized loss, personality or mental-health issues, grief overload, and other factors.

- Multiple loss and bereavement overload
- Unmourned—or carried—grief
- Depression in grief—What’s normal? What’s clinical depression?

Death & Grief Studies Certification

Bereavement caregivers who complete five Center for Loss courses (150 hours) are awarded the “Death & Grief Studies Certification.”

What an affirming way to be recognized for your ongoing commitment to bereavement care!

While you are welcome to take seminars in any sequence, we have found

that Comprehensive Bereavement Skills Training is an excellent way to get started. Also, it is the required core course for our certification.

HOW LONG DO I HAVE TO COMPLETE MY DEATH & GRIEF STUDIES CERTIFICATION?

This certification is awarded to you after the completion of five courses (150 hours) from the Center. We understand this can be a large financial as well as time commitment. Therefore, we place no time limit on the completion of this certification. In fact, it is recommended that you take some time between each course to absorb the information and incorporate it into your work.

While some students choose to complete the certification in a year, there are others who take five or more years. What is most important is that you work toward this at your pace and select courses that are applicable to your needs.

CONTINUING EDUCATION UNITS

The Center for Loss provides participants with a Certification of completion at the end of each class. This is sufficient for the continuing education requirements of many professional associations.

Many participants wish to receive official CEUs (Continuing Education Units). As you may know, CEUs are designed to measure participation in learning experiences other than academic courses. As such, these units do not satisfy any requirements toward a degree, but they do provide a permanent record for professional training and enrichment activities.

Colorado State University’s Division of Outreach, located here in Fort Collins, administers and grants CEUs for each of our courses. One CEU represents 10 hours of instruction; our 4-day seminars are worth 3 CEUs each. The fee for 3 CEUs is \$50 and payable by check, Visa, or MasterCard to Colorado State University during the week of your course.

Our training course contact hours are also pre-approved to qualify toward the hours needed to apply to take the Certification in Thanatology exam through the Association for Death Education and Counseling.

“I have completed my certification at the Center and encourage other caregivers to do the same. A fantastic experience.”

— A counselor

“I’m glad I took the Comprehensive Bereavement Skills class first! It helped me to understand the depth and intensity of companionship. For me, Comprehensive Bereavement Skills Training was like the foundation of a house—everything built on top of it.”

— A hospice social worker

Basics and Questions

WHEN ARE THE SEMINARS AND WHAT IS THE DAILY SCHEDULE?

Please see page 15 for a list of courses we will be offering in 2017-2018.

Our training seminars are each three-and-a-half days long. You will meet other participants in the designated conference room at the hotel, where training begins each day at 8:00 am. Breakfast will be served from 7:00 to 8:00 am, and lunch will be from noon to 1:00 pm.

On Monday through Wednesday class will end by 4:00 pm. On Thursday the course graduation will wrap up at 12:00 pm. "Mourning in our culture isn't always easy. Normal thoughts and feelings connected to loss are typically seen as unnecessary and even shameful. Instead of encouraging mourners to express themselves, our culture's unstated rules would have them avoid their hurt and 'be strong.'"

"But grief is not a disease. Instead, it is the normal, healthy process of embracing the mystery of the death of someone loved. If mourners see themselves as active participants in their healing, they will experience a renewed sense of meaning and purpose in life."
