## A Note from Alan Wolfelt

Thank you for your interest in our educational seminars for bereavement caregivers. I am so excited to share our 2021-2022

schedule with you! Supporting those who support the bereaved is my life's work and passion. I simply love to teach and am so gratified that thousands of caregivers have participated in my small group seminars over the past 35 years.

*The Center for Loss and Life Transition in Fort Collins, Colorado.*

We are privileged to share the art of compassionate caregiving with people from across North America and the world. We will do our best to make this an experience you will remember and value for the rest of your life!

If you are thinking of attending a Center for Loss seminar, I invite you to consider the philosophy that informs my work with bereaved people as well

as my teaching. I believe in “companioning” the bereaved instead of “treating” them.

I have taken liberties with the noun “companion” and made it into the verb “companioning” because it so well captures the type of counseling relationship I support. Actually, the word companion, when broken down into its original Latin roots, means *com* for “with” and *pan* for “bread.” Someone you would share a meal with. A friend. An equal.

Please be aware that not everyone is comfortable in the culture of “companioning.” Please read through the information contained here very carefully. I urge you to use discernment in determining if the Center for Loss learning experiences are a good match for your fundamental learning style and philosophy of caring for your fellow human beings during times of loss and grief.

Please call or email the Center with any questions or to inquire about course availability. I look forward to meeting you and learning from each other.

Alan D. Wolfelt, Ph.D., C.T.  
Director

### DR. WOLFELT'S TENETS OF COMPANIONING THE BEREAVED

Companioning is about being present to another person's pain; it is not about taking away the pain.

Companioning is about going to the wilderness of the soul with another human being; it is not about thinking you are responsible for finding the way out.

Companioning is about honoring the spirit; it is not about focusing on the intellect.

Companioning is about listening with the heart; it is not about analyzing with the head.

Companioning is about bearing witness to the struggles of others; it is not about judging or directing these struggles.

Companioning is about walking alongside; it is not about leading.

Companioning is about discovering the gifts of sacred silence; it is not about filling up every moment with words.

Companioning is about being still; it is not about frantic movement forward.

Companioning is about respecting disorder and confusion; it is not about imposing order and logic.

Companioning is about learning from others; it is not about teaching them.

Companioning is about compassionate curiosity; it is not about expertise.

Fort Collins, Colorado

“Mourning in our culture isn't always easy. Normal thoughts and feelings connected to loss are typically seen as unnecessary and even shameful. Instead of encouraging mourners to express themselves, our culture's unstated rules would have them avoid their hurt and 'be strong.'  
“But grief is not a disease. Instead, it is the normal, healthy process of embracing the mystery of the death of someone loved. If mourners see themselves as active participants in their healing, they will experience a renewed sense of meaning and purpose in life.”

# Understanding and Responding to Complicated Mourning

2021	SCOTTSDALE	• December 6-9
2022	FORT COLLINS	• August 8-11

Complicated mourning is normal grief that has become stuck or made more complex by various circumstances, including traumatic or marginalized loss, personality or mental-health issues, grief overload, and other factors.

Participants will receive a copy of *When Grief is Complicated* and *When Grief is Complicated Educational Supplement*

Dr. Wolfelt will teach you his model for identifying, understanding, and companioning mourners through their challenging grief journeys. This is an essential training for those wanting to learn specific ways to identify and assist people with the natural complications of grief and mourning. While there is a tendency for some to want to “treat” complicated grief, Dr. Wolfelt will advocate for the compassionate use of a companioning approach to caregiving that has been effectively used at his Center for Loss for many years. If this appeals to you, please make plans now to come join us.

Together we’ll explore important topics such as:

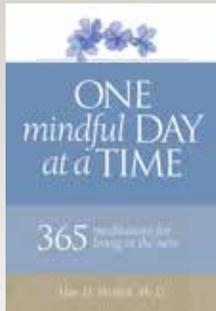

- The history of modern psychology’s understanding of complicated grief
- Understanding the origins of complicated grief

# Exploring Spiritual Dimensions of Death, Grief and Mourning

2021 FORT COLLINS • May 3-6

Bereavement naturally results in the “dark night of the soul,” writes Dr. Wolfelt. A central need of those in grief is to rejuvenate the spirit, to discover a reason to get one’s feet out of bed in the morning. Dr. Wolfelt will explore

Participants will receive a copy of Dr. Wolfelt’s book *Healing Your Grieving Soul*.

# Companioning the Mourner from Hello to Goodbye, Dark to Light, and Backward to Forward

2022 FORT COLLINS • May 9-12

Participants will receive a copy of Dr. Wolfelt’s book *The Paradoxes of Mourning*.

Don’t miss the opportunity to join us for this advanced level learning experience as you build your knowledge and skills to provide compassionate support and counsel to people experiencing grief. Dr. Wolfelt often says, “You have to join the mourner where they are, before there is any space for movement.” Come join like-hearted caregivers and learn how to artfully “companion” the mourner into and through three essential truths:

*Truth One:* You must say hello to say goodbye.

*Truth Two:* You must make friends with the darkness before you can enter the light.

*Truth Three:* You must go backward before you can go forward.

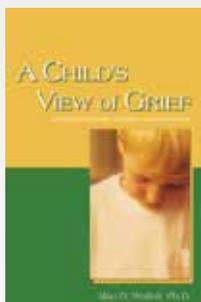

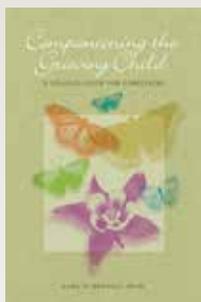

Participation in this training will allow you to enhance your understanding of how our culture clings to a number of misconceptions about grief. In addition, you will learn about what Dr. Wolfelt calls “medical-model-treatment introjects” that make the reconciling of grief naturally complicated for many mourners. You will explore and discuss- how the mourner is often told to be strong when she needs to be vulnerable; how the mourner is often told to think positive when she needs to befriend the pain; and how the mourner is often told to seek closure when she really needs is to welcome her natural and necessary grief.

Plan to join us and you learn more about how to honor these three truths— their historical roots as well as the ways in which they have been abandoned and even vilified by contemporary Western culture. You will learn specific companioning skills that allow you to join the mourner and create the necessary space to say hello on the path to goodbye, to affirm the value of darkness before light, and to respect the natural organic instinct to go backward before forward. You will also be invited to enhance your understanding of what Dr. Wolfelt has termed the “Slow Grief Movement” Register early as this training will fill to capacity well in advance.

# Helping Children and Adolescents Cope with Grief

2021 FORT COLLINS • July 19-22

Dr. Wolfelt has always written that children and teens are our finest teachers about grief and mourning. Sadly, in contemporary culture they are at risk for being “forgotten mourners.” Join us for this inspiring training and learn how children and teens teach us more through their behaviors than through their words.

Participants will receive a copy of *Companionship the Grieving Child* and *A Child's View of Grief*.

You will learn how the philosophy of “companionship” grieving children and teens is more art than science. Come learn how to create a sacred space that encourages children to teach you as they “dose” themselves on the central needs of mourning. Even if you don’t work directly with this population, this learning

experience will enhance your capacity to support families experiencing grief. Topics include:

- The major factors influencing the child’s response to loss
- Dimensions of childhood grief and helping roles
- Six central reconciliation needs of childhood mourning
- Tools & techniques used in counseling bereaved children
- Potential inhibitors of the child’s capacity to mourn
- Guidelines for facilitating bereaved child and adolescent support groups
- Special considerations for the adolescent mourner
- Identifying the “detached child”
- Referral criteria and recommended reading lists

Using the “Ten Touchstones” of his bestselling book *Understanding Your Grief* as a framework, he will step you through messaging and methods for educating others about the basic principles of grief, mourning, and healing. Dr. Wolfelt will also share practical insider tips on topics such as event formats, engaging your audience,

creating teaching objectives, building relationships with potential sponsors, and much more.

Whether you would like to train others in your organization, do public speaking in your community, or simply feel more confident passing along information to clients, colleagues, or friends, this workshop will both inspire and prepare you to be an effective grief advocate wherever you go.

a child dies, it's as if a deep hole implodes inside the parent. It's as if the hole penetrates them and leaves them gasping for air. As Nicholas Wolterstoff wrote so honestly in *Lament for a Son*, “It's hard to keep one's footing.” This training will help you provide some “footing” to grieving parents.

Topics will include:

- Understanding attachment influences on the parent-child bond
- Unique influences on parental grief: the whys of the journey
- The special features of miscarriage, stillbirth, infant death, and teen death
- The special features of the death of an adult child

## Death & Grief Studies Certification

Bereavement caregivers who complete five Center for Loss courses (150 hours) are awarded the

“Death & Grief Studies Certification.”

What an affirming way to be recognized for your

ongoing commitment to bereavement care!

While you are welcome to take seminars in any sequence, we have found that Comprehensive Bereavement Skills Training is an excellent way to get started. Also, it is the required core course for our certification.

### HOW LONG DO I HAVE TO COMPLETE MY DEATH & GRIEF STUDIES CERTIFICATION?

This certification is awarded to you after the completion of five courses (150 hours) from the Center. We understand this can be a large financial as well as time commitment. Therefore, we place no time limit on the completion of this certification. In fact, it is recommended that you take some time between each course to absorb the information and incorporate it into your work.

While some students choose to complete the certification in a year, there are others who take five or more years. What is most important is that you work toward this at your pace and select courses that are applicable to your needs.

“I have completed my certification at the Center and encourage other caregivers to do the same. A fantastic experience.”

— A counselor

.....  
 “As a bereaved parent, the Companioning Bereaved Parents training was priceless. I would encourage other bereaved parents to attend to share insight, stories, etc. with caregivers and other professionals. This is such a wonderful learning opportunity for all involved.”

—A recent participant

.....  
 “What an amazing training! From the very first morning of class, when new names and faces would soon become dear companions and shared souls, I felt comfortable and cared for and filled with gratitude. . . The experience was inspiring and humbling.”

— A hospice social worker

.....  
 “To say this experience was profound is an understatement!”

— A bereaved mother & future grief companion

.....  
 “I was truly touched by the strength of spirit of the participants...and the training content teaches the art of ‘walking with’ and ‘companioning’ those in grief. I’m already scheduled to return for more.”

— A hospice social worker

.....  
 “If we as caregivers cannot be still in the presence of what I call “care-eliciting symptoms”— such as sadness, anxiety, ambiguity, loss of control — the result will be an attempt to treat them away. Grief invites us into “liminal space” and that is often right where we need to be.”

— Alan D. Wolfelt, Ph.D.

**CONTINUING EDUCATION UNITS**

The Center for Loss provides participants with a Certification of completion at the end of each class. This is sufficient for the continuing education requirements of many professional associations.

Many participants wish to receive official CEUs (Continuing Education Units). As you may know, CEUs are designed to measure participation in learning experiences other than academic courses. As such, these units do not satisfy any requirements toward a degree, but they do provide a permanent record for professional training and enrichment activities.

Colorado State University’s Division of Outreach, located here in Fort Collins, administers and grants CEUs for each of our courses. One CEU represents 10 hours of instruction; our 4-day seminars are worth 3 CEUs each. The fee for 3 CEUs is \$50 and payable by check, Visa, or MasterCard to Colorado State University during the week of your course.

Our training course contact hours are also pre-approved to qualify toward the hours needed to apply to take the Certification in Thanatology exam through the Association for Death Education and Counseling.
